

1. Which equals 100 less than 845? Choose all that apply.

**1 point**

- 945
- $900 + 40 + 5$
- 745
- $700 + 40 + 5$
- $800 + 100 + 45$

2. The open number line below shows subtraction.

**1 point**

Complete the equation.

Write the numbers being subtracted and the difference.

$$\underline{692} - \underline{221} = \underline{471}$$

3. John collected 396 toy cars. Chloe collected 256 fewer toy cars than John. How many toy cars did they collect in all? **1 point**

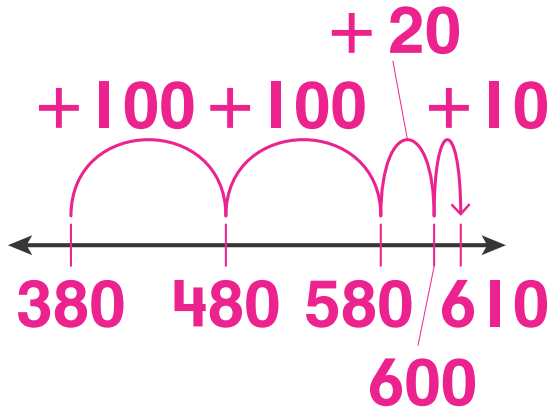

- (A) 652
- (B) 792
- (C) 140
- (D) 536

4. There are 463 adults and 264 children at a movie. How many more adults than children are at the movie? **1 point**

- (A) 199
- (B) 201
- (C) 219
- (D) 299

5. Show how to add up on an open number line to find  $610 - 380$ . Then write the difference below. **2 points**

**Sample work shown.**

$$610 - 380 = \underline{230}$$

6. Look at your work in Item 5. Explain how you used the number line to find the difference. **1 point**

**Sample answer:**  
 I start at 380.  
 I add 100, then 100, then 20, and then 10 to land on 610.  $100 + 100 + 20 + 10 = 230$ , so  $610 - 380 = 230$ .

7. Use place value and partial differences to find  $392 - 128$ . Show your work. **2 points**

<b>Sample work:</b>	$\begin{array}{r} 392 \\ - 100 \\ \hline 292 \\ - 20 \\ \hline 272 \\ - 2 \\ \hline 270 \\ - 6 \\ \hline 264 \end{array}$
---------------------	---

$$392 - 128 = \underline{264}$$

8. Draw place-value blocks to find the difference of  $325 - 172$ . **2 points**

Hundreds	Tens	Ones
<b>Check students' work.</b>		

$$325 - 172 = \underline{153}$$
